Now you can replace missing teeth, repair cracked or broken dentures, and get access to dental grade solutions to whiten your dentures!

Doing it yourself has its benefits...

- **No more waiting to get your dentures back**
- **Save BIG on dentist fees**

Dear Fellow Denture Wearer,

For those of you who don't know us, we are known as the "most feared" dental laboratory in the world. Dentists, in partnership with their "Big Brother" dental associations, have a big interest in keeping you from going directly to laboratories and supply companies like ours.

When you go direct to dental laboratories like ours, you're able to get access to the same materials and supplies used by dentist to fix and repair your own dentures. Good news for you, and bad news for dentists who want to charge you hundreds of dollars for simple repairs or tooth replacements.

Most states make it illegal for dental laboratories to do work directly for denture wearers. Instead, they make you go through a dentist, who in turn have other dental technicians or labs do the repairs. In other

Do-It-Yourself Denture Repair and Save Hundreds!

Today... you've stumbled upon a website that dentists didn't want you to know about.

Immediate benefits, and instant savings...

No More Waiting - When your denture breaks or when you suddenly lose a tooth, you can immediately fix it yourself without having to wait days to see

words, most dentists never even touch or repair your dentures.

It's Just a Matter of Time Before You'll Lose a Tooth (or Break Your Dentures)

...And when your dentures break, it'll be at the most inconvenient time. More often than not, you'll be unable to get to your dentists' office either because it occurred over the weekend while their office was closed, or... you were away from home and couldn't get to your dentist.

Because many state laws prevent laboratories from selling dental grade materials and supplies in local retail centers, many denture wearers end up buying super glues to fix their dentures when they break. The problem with super glue is that it's only a temporary fix; and in many cases, the glue itself will breakdown and eat away at the denture, which typically means you'll have to purchase another set because of the damage.

Get Access To The Same Acrylics, Adhesives and Professional Teeth Used By Dentists and Dental Labs

We have the only denture repair kit available to the public with professional replacement teeth, and the actual adhesives and monomers to make a perfect repair!

This unique repair kit not only allows you to repair your own dentures in an emergency, but it also produces a strong, smooth bond in the repair, leaving the denture as strong as it was originally, and with no impediment to your tongue or to your speech.

Much Of The Damage Done To Dentures Involves The Loss Of Teeth

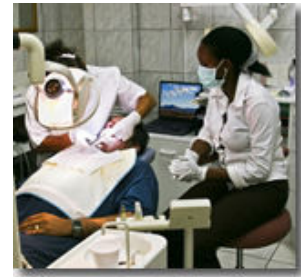

Unlike other kits that only give you 6 teeth, we'll give you an entire set of teeth for both the front and your back. We're not fortune tellers, so instead of us trying to figure out which teeth are the most likely to pop out, we'll just give you all of them!

This unique repair kit not only allows you to repair your own dentures in an emergency, but it also produces a strong, smooth bond in the repair; leaving the denture as strong as it was originally, and with no impediment to your tongue or speech.

your dentists. Afterall, dentures tend to break at the most inconvenient times right?

Save Hundreds - Each denture repair kit comes with enough supplies and materials that'll allow you to make up to 24 repairs. With the average cost of repairing dentures ranging anywhere from \$75-\$195 for each visit, just imagine how much you'll save if you only use the kit twice!

Professional Dental Grade Materials - You'll be getting the same denture materials and supplies that dentists and dental laboratories use to make and repair actual dentures. You'll also be receiving professional denture teeth, acrylics and monomer to repair cracks and breaks!

Convenience - If your dentures crack or break, or if you lose a tooth, you'll be able to make the repairs yourself, often in less than

These are Your Posterior/Back Teeth (uppers & lowers)

Our kit can save you hundreds in denture repair fees, and best of all, they're extremely easy to use...

Don't take our word for it! Take a look at what Mr. Shannon Baughman had to say about the kit...

"I am in no way a denture professional, but to tell you the truth, I am very confident that my repair was better than what I would have recieved from someone else. "

I just gotta take this opportunity to thank you for the repair kit that I ordered from you a couple months ago.

I had broken my bottom partial and I was having trouble from my dentist about repairing them. When I purchased my dentures originally, he promised free service for the life of the denture. But whenever I needed service, he would not honor his promise.

Now, I am the do-it-yourself type and I have always been, but dentures... that was a whole different world for me. I couldn't go around with a broken partial, and I sure did not trust just any fix. I wanted something safe and strong, and I found your website. The price was right, and your ad sounded sincere so I ordered a repair kit.

I was very nervous at first, but determined to give it a shot. And to tell you the truth, with the easy instructions that you sent, I felt very comfortable with the procedure. I followed the sheet to a T and in a few minutes, I was showing off a very professional repair.

That was several months ago, and believe it or not, I had a six-month check-up yesterday and the dentist complimented that the partial was fitting excellent. Little did he know that I not only repaired them myself, but also had repaired a flaw that were in them from the beginning.

I am in no way a denture professional, but to tell you the truth, I am very confident that my repair was better than what I would have recieved from someone else. And no time was I without dentures waiting for the fix. Thanks Mike. I would do it again in a minute.

You sent me a very professional kit at a great price. If you need endorsement for your product, well here it is. I could not be

5-10 minutes.

happier. I am here if you need any more feedback. My cell no. is ***-***-****. Thanks again!

Mr. Shannon Baughman

We have invested thousands of dollars trying to make this system as easy as possible for you to use.

Dentists already know that most people who wear dentures already know how to fix and repair them? But, the problem is, dentists won't make the supplies and materials that are needed to repair dentures available to denture wearers... but not anymore!

Repair-A-Dent is the Most Effective Denture Repair System on the Market!

Step by step Instructions

You probably already know how to fix your own dentures; but just in case, we've included some easy to follow instructions to help you in the event you get a nasty break or crack in your dentures.

6 Lower Anterior (Front) Professional Replacement Teeth

Your front teeth are the most common ones to pop out. Your denture repair kit comes with 6 lower anterior (bottom front teeth) replacements.

8 Lower Posterior (Back) Professional Replacement Teeth

Unlike other kits that don't come with teeth for the back part of your dentures, we got you covered.

Professional Denture Acrylic Resins

This is the exact same material that your denture is made out of. This is required to build and repair where the crack or break took place in the denture.

Professional Strength Denture Cleaner

You can't buy this at the store. Use this professional grade strength denture cleaner and your dentures will be fresh, clean, and looking brand spanking new again.

6 Upper Anterior (Front) Professional Replacement Teeth

Your front teeth are the most common ones to pop out. Your denture repair kit comes with 6 lower anterior (bottom front teeth) replacements.

8 Upper Posterior (Back) Professional Replacement Teeth

Unlike other kits that don't come with teeth for the back part of your dentures, we got you covered.

Professional Bonding

Adhesives / Monomer - You'll use this in combination with the acrylic resins to make your repairs bond and hold in place. Glues from the store can and will breakdown your dentures.

We're the Only Laboratory to Offer a 30-Day Risk-FREE Trial on Our Repair Kits

Try our system for 30 days and if it's doesn't work to your expectations, we'll gladly refund your money. That's how confident we are about our product. We're willing to assume the risk in an effort to get this system into your hands. We know that once you try it, you'll be more than satisfied with it!

Professional Dental Grade Materials

- You'll be getting the same denture materials and supplies that dentists and dental laboratories use to make and repair actual dentures. You'll also be receiving professional denture teeth, acrylics and monomer to repair cracks and breaks!

Convenience - If your dentures crack or break, or if you lose a tooth, you'll be able to make the repairs yourself, often in less than 5-10 minutes.

"He was arrested for practicing dentistry without a license..."

I am a young man and a denture wearer. I had no idea how fragile these things were as I was not given the full scoop by my dentist. I don't know if she was under the impression that I already knew(How could she?).

The first day I got the damn things, they were so tight and uncomfortable and I was in so much pain that I took them out and left them on the night stand while I took a nap. When I woke up, my dog chewed the damn things to bits. Can you imagine how embarrassing and costly that episode was?

Another time, it fell in the shower and splintered. However, this time I found a guy with an emergency repair outfit. He did a pretty good job, although I had to sit in his office with no teeth for about 2 hours.

His business might have picked up afterwards, but I saw on the news that **he was arrested for practicing dentistry without a license**. I was so happy when I found your site as I had another emergency and needed help.

I don't need anymore replacement teeth, but I really need more of the pink powder and liquid. Please reply to me with a price list, customer code (I forgot), and any discounts you may have to offer.

Thanks in advance.

W. Forbes

Jail Time... I Told You, These Guys Are Serious!

I told you... many of these states don't allow customers to go to a dental lab to have their dentures repaired unless they go through a dentist (although most dentists don't make or repair dentures --- they contract the work out to dental laboratories like ours!

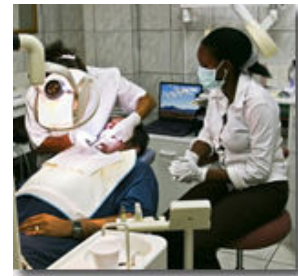

This is their way of keeping you from dealing directly with labs, who would actually charge you much less to make or repair your dentures. The way the laws are written vary from each state, but for the most part they all say the same thing...

People are now starting to go to Canada and Mexico to get their dentures made because it's much cheaper, and they generally get a better denture made for far less outside of the country.

You Don't Have to Leave the Country to Get Your Dentures Repaired... Not Anymore!

With our denture repair system, you're now able to fix and repair your own dentures at your convenience. No more waiting for the dentists, no more outrageous fees, and no risk of your local repair guy having to go to jail for trying to help you fix your dentures :-)

Our affordable system makes it easy for anyone to do it themselves.

Save Hundreds - Each denture repair kit comes with enough supplies and materials that'll allow you to make up to 24 repairs. With the average cost of repairing dentures ranging anywhere from \$75-\$195 for each visit, just imagine how much you'll save if you only use the kit twice!

Professional Dental Grade Materials - You'll be getting the same denture materials and supplies that dentists and dental laboratories use to make and repair actual dentures. You'll also be receiving professional denture teeth, acrylics and monomer to repair cracks and breaks!
